
Bearing to Know

The State of our World

On Every Account

The planet's going bankrupt
with banks still full of pretend wealth

It's business as usual
as the earth slowly goes out of business

We are overdrawn on every account
with no means of clearing our debt

No duty of care from our leaders
no stewardship
Business only minding its own self-serving business
Experts shelling out advice
selling out to the highest bidder

And no excuse from the rest of us
for blindly accepting what is not ours

For receiving stolen goods
